Real test: the swarm's mesh is closer to the measured curve, but with 2.2x the nodes
(not an equal-budget win yet: the fine-tuned mesh is pending)
measured (Instron test)
automesher: 2,937 nodes, 7.84 % off
swarm bc0 mesh: 6,430 nodes, 4.57 % off
fine-tuned mesh (pending)
checkpoints (where the error is measured)
